### THE COMPLETE DOCUMENT MANAGEMENT SYSTEM

ImageWorks *WEB* offers a total document management solution without any of the complications usually associated with electronic document storage. This cutting-edge ASP "Application Service Provider" imaging model gives you all of the functionality of a state-of-the-art Document Management Solution without any of the headaches. A company can scan, store and retrieve all of its critical documents via secure remote access from anywhere in the world. This solution eliminates the need to purchase and maintain the expensive hardware, software and IT infrastructure necessary to implement an "in-house" imaging system.

With ImageWorks *WEB*, there is no capital outlay for software or hardware and there is no maintenance of any server hardware or software on your part. We take care of everything.

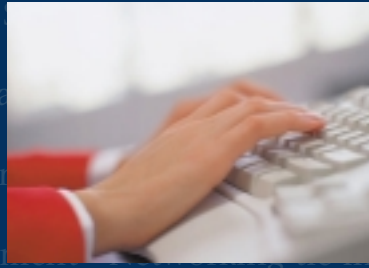

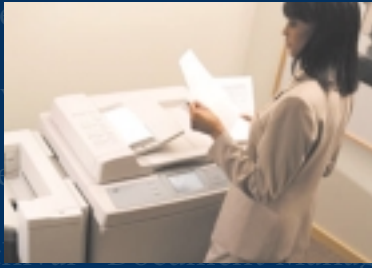

### KEY FEATURES & OFFERINGS

- Manage your critical files and documents from one easy-to-use, web-based system.
- Easily scan, index and retrieve your company's documents and files.
- Create customizable indexing structures for different departments and document types.
- Secure your documents from unauthorized access with our on-line set of security, audit trail and permissions tools.
- Quickly print, fax or e-mail any document in the system.
- Multiple users can access files simultaneously.
- Easily control document archival, disaster recovery, as well as critical file retention lifecycles.
- Unlimited scanning and viewing stations.
- Link to existing databases to automatically pull indexing criteria.
- Import other files (*Word Docs, Excel Spreadsheets, etc.*) to be stored alongside your scanned documents.

**No Software to Purchase or Maintain!**  
**No Hardware to Purchase or Maintain!**  
**All you need is Internet Access!**

# 4 Easy Steps to Complete Document Management

## 1 Scan

Scan the document using any standard scanner or multi-function device.

## 2 Index

Perform customizable indexing at any workstation or device.

## 3 Upload

Your encrypted images and corresponding indexes are automatically uploaded.

## 4 Retrieve

View your documents and files securely at anytime - from anywhere in the world.

**Document Scanning Services** are also available from our company on or off-site. Let us take care of the production work for you!

**Optional Software Tools** include: Barcoding, Full Text and Zonal OCR, and Legacy Systems Integration.

**In-House Application** version and **Fully Customized** version of ImageWorks Document Management Software also available.

## TWO LEVELS OF SECURITY FOR YOUR PROTECTION

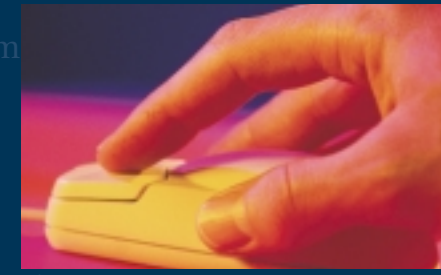

### LEVEL ONE - PRIMARY HOSTING FACILITY
